

# McCarrons Lakefront Alliance

## HELLO LAKE MCCARRONS NEIGHBORS!

The summer of 2019 has been rough for Lake McCarrons with E. coli contamination and the recent discovery of zebra mussels. To combat these issues, improve communication, and join together, we created **McCarrons Lakefront Alliance**!

## ABOUT

A group of volunteers has created **McCarrons Lakefront Alliance**, a lake association with the overall goal of enhancing the health, quality, and recreational capacity of Lake McCarrons.

## WHY DO WE NEED A LAKE ASSOCIATION?

Lake McCarrons is an invaluable resource in southeast Roseville and a highly rated lake in terms of quality and clarity. We'd like to keep it that way.

Statewide, lakeshore communities with active, strong lake associations do better at marshalling resources from various entities. The volunteers who started **McCarrons Lakefront Alliance** believe it's time for us to be more proactive in advocating for our lake, educating the public and communicating issues to homeowners. After all, if we homeowners don't take care of Lake McCarrons, who will?

## INVASIVE SPECIES

**McCarrons Lakefront Alliance** will provide a framework to help us control and monitor the zebra mussels we have, educate others in the prevention of invasive species, work with public and private entities, raise funds for possible treatment, and keep the community informed.

## WE WANT TO HEAR FROM YOU

Please complete the survey at the site below so we can make this group great!

## QUESTIONS?

See a list of frequently asked questions at the site below or send us an email.

<https://www.mccarronslakefront.org/about/faq>

## LAUNCHING THIS FALL

This is an exciting opportunity for lakefront residents to be empowered and informed. We'd love for you to be a part of it and believe our lake will be better if we work together.

## INFORMATIONAL MEETING

**WEDNESDAY, SEPT. 25**

**7 p.m. at Villa Park**

Please join us for an informational meeting where Justin Townsend, aquatic invasive species coordinator for Ramsey County, will talk about the zebra mussel discovery and how we can move forward.

**SEE YOU ON THE LAKE!**
